Come join us and learn from the foremost experts in Muscle Energy Technique! The Mitchell family both developed the system and refined it for decades and are now offering this rare opportunity for other health care professionals to learn it.

This continuous development of MET within the Mitchell family has resulted in MET moving from being a collection of individual techniques for addressing muscle imbalances and arthrokinematic dysfunctions, to being a more refined, organized, and comprehensive system of evaluation and treatment.

Day 1 Theory of muscle energy, osteopathy and techniques for the Pelvis.

Day 2. Evaluation and Techniques for the Lumbar Spine
